Leveraging more than 120 years of heritage, our No.101 sliding door track systems have been re-engineered for the 21st-century consumer to assure authentic and lasting architectural significance. These commercial quality hardware systems are available in multiple configurations and can accommodate 1-3/8" to 2-1/2" thick doors weighing up to 1000lbs when installed properly. Each system is individually packaged and includes a 1-1/2" diameter track assembly with mounting brackets, No.3 cast iron door hangers and door guide.

No. 1303 Track System

Our No.303 Heavy Door Track Systems can be complex to install, so we recommend using a professional garage door installation company for the best results. All systems are specifically designed to fit the listed openings. For applications where a custom length is required the tracks can easily be cut to the desired length by the installation technician. Optional parts and accessories which coordinate with our No.303 sliding door track systems can be purchased separately.
